

Rolando Palermo Rodríguez Cruz

Software Architect | Distributed Systems, Cloud & Platform Engineering

+52 4451401994 | rolando.roc@gmail.com | Guanajuato, México
linkedin.com/in/RolandoPalermo | github.com/RolandoPalermo

Profile

Software Architect with 13+ years of experience designing enterprise platforms, distributed systems, cloud-native architectures, and large-scale integrations across retail, payments, logistics, telecommunications, and electronic invoicing industries.

Experienced in defining architecture roadmaps, establishing technology standards, designing scalable microservices ecosystems, and leading modernization initiatives aligned with business objectives. Strong background in Java/Kotlin ecosystems, event-driven architectures, cloud platforms, API governance, infrastructure automation, observability, and platform engineering.

Proven ability to bridge business and technology by translating strategic requirements into scalable technical solutions while mentoring engineering teams and driving architectural excellence across complex enterprise environments.

Professional Experience

MHP – A Porsche Company <i>Software Architect</i>	Guadalajara, Mexico <i>Aug 2025 – May 2026</i>
- Defined the target architecture and technical strategy for a VDA5050/LIF-based logistics orchestration platform supporting industrial automation and autonomous vehicle ecosystems. - Established architecture principles, integration standards, and governance processes to ensure platform scalability, maintainability, and long-term evolution. - Partnered with Product Management and Engineering Leadership to align business objectives with architectural roadmaps and technical investments. - Designed distributed systems leveraging Kotlin, Java 21, Spring Boot 3, MQTT, RabbitMQ, MongoDB, and event-driven architecture patterns. - Defined API governance standards using OpenAPI Specification (OAS), promoting contract-first development and service consistency. - Led architecture reviews, technical risk assessments, and solution design workshops across multiple engineering teams. - Designed cloud-native deployment architectures and infrastructure automation using Terraform, Ansible, Docker, and AWS services including ECR, S3, VPC, IAM, and RDS. - Drove non-functional architecture requirements including resiliency, observability, performance, security, and operational excellence.	
Petco <i>Software Architect</i>	Queretaro, Mexico <i>Sep 2024 – Jul 2025</i>

- o Defined architecture strategy and modernization initiatives for retail commerce and point-of-sale platforms supporting more than 1,000 stores across the organization.
- o Designed enterprise integration architectures for payment processing ecosystems involving Ingenico, Verifone, ACI, and omnichannel retail workflows.
- o Established microservices architecture standards using Java 17, Spring Boot 3, PostgreSQL, MongoDB, Docker, and event-driven integration patterns.
- o Designed cloud-native solutions on AWS (EKS, ECR, S3, VPC, IAM, and RDS), improving scalability, resiliency, and deployment automation.
- o Defined API architecture guidelines, domain boundaries, service decomposition strategies, and OpenAPI governance practices.
- o Led technical design reviews and architectural decision-making processes across multiple teams and business initiatives.
- o Collaborated with product, infrastructure, security, and operations teams to ensure alignment between business goals and platform evolution.
- o Drove architecture improvements focused on reliability, performance, observability, security, and maintainability across mission-critical retail systems.

Forvia

Shopfloor Software Specialist

Tlaquepaque, Mexico

Jul 2024 – Sep 2024

- o Built enterprise microservices using Spring Boot 3, Java 17, and MySQL, improving maintainability and service modularization.
- o Used OpenAPI Specification (OAS) and Swagger to document and validate service contracts, improving consistency across backend integrations.
- o Developed responsive frontend applications with Angular 13 and ng-zorro, improving usability and reducing operational friction for end users.
- o Automated CI/CD workflows using GitLab pipelines and Docker-based deployment workflows, improving release reliability and accelerating delivery cycles.
- o Identified and resolved production bottlenecks, improving application responsiveness and operational efficiency.

Rappi

Backend Developer

Mexico City, Mexico

Jul 2021 – May 2024

- o Contributed to large-scale distributed platforms using Java 11, Kotlin, Spring Boot 3, Kafka, and MongoDB, supporting high-traffic e-commerce and delivery operations.
- o Applied concurrency, multithreading, and JVM performance optimization techniques to improve throughput and reduce processing bottlenecks under heavy workloads.
- o Built and maintained large-scale analytics and operational reporting pipelines using DBT, Airflow, and Astronomer.
- o Implemented CI/CD automation workflows using Docker, Jenkins, and Groovy, improving deployment consistency and release automation.
- o Ensured backend quality and maintainability through automated testing, continuous inspection, and engineering best practices.
- o Collaborated within Agile/Scrum teams delivering iterative improvements across distributed backend services.

BairesDev

Full Stack Engineer

Buenos Aires, Argentina

Jul 2019 – Apr 2021

- o Promoted from Backend Engineer to Full Stack Engineer to lead end-to-end feature delivery across backend services and frontend applications.
- o Designed scalable RESTful APIs and enterprise integration solutions using Spring Boot 2.7, Spring Security, OAuth 2.0, Apache Camel 2.25.2, ActiveMQ, JPA/Hibernate, Flyway, and Gradle, implementing dynamic routing, Content-Based Router (EIP) patterns, file polling workflows, and runtime route registration.
- o Developed responsive frontend applications using Angular 8 and Angular Material, improving usability and user experience.
- o Implemented logging and observability solutions using Log4j and Splunk, improving monitoring visibility and incident resolution efficiency.
- o Built and maintained Jenkins CI/CD pipelines, improving deployment automation and release reliability.
- o Contributed to Agile/Scrum teams using Jira and Confluence to deliver scalable enterprise features iteratively.

Softtek

Java Backend Developer

California, USA

May 2018 – May 2019

- o Developed backend services and enterprise integrations using Java, Spring Boot, Camunda, ActiveMQ, and BPMN 2.0 for complex workflow orchestration.
- o Built SOAP and RESTful integrations using XML technologies including XSLT, XPath, XQuery, and JAXB for enterprise data transformation.
- o Designed and optimized persistence and distributed data processing solutions using Oracle 11g, MySQL, and Apache Ignite.
- o Worked on enterprise document generation workflows using Perceptive Document Composition.
- o Collaborated within Agile environments using Jira, Bamboo, Jenkins, GitLab, and Confluence to support continuous delivery processes.

Seguritech

Java Senior Developer

León, Mexico

Nov 2017 – Apr 2018

- o Designed and developed computer-aided dispatch (CAD) systems for public safety and emergency coordination.
- o Built responsive frontend interfaces using AngularJS, JavaScript, HTML5, CSS, and jQuery.
- o Developed enterprise backend integrations using Spring Framework, Apache CXF, JAX-WS, and RESTful/SOAP services.
- o Optimized complex SQL operations, improving database performance and reducing response times.

MDP

Java Developer

Lima, Peru

Mar 2017 – Aug 2017

- o Led migration of a legacy enterprise application from Struts 2 to Spring MVC 4.
- o Implemented a flexible Spring Security-based authentication framework supporting multiple identity providers.
- o Collaborated within Agile delivery environments using Scrum and Kanban methodologies.

IA Interactive

Java Developer

Morelia, Mexico

Nov 2016 – Feb 2017

- o Developed enterprise full-stack solutions using Java 8, Spring Framework, JavaScript, jQuery, Bootstrap, and Maven.
- o Built SOAP-based integrations and SAP HCM integrations using SAP JCo and RFC.
- o Collaborated within Agile/Scrum teams to deliver iterative enterprise solutions.

Sistema Nacional de Investigadores (CONAHCYT)

Research Associate

Guanajuato, Mexico

Jul 2014 – Jul 2016

- o Served as Research Associate within Mexico's National System of Researchers (CONAHCYT), contributing to academic and applied technology initiatives.
- o Worked as professor at the University of Guanajuato mentoring undergraduate Computer Systems Engineering students.
- o Recognized as Outstanding Student (2014–2015) for academic excellence and performance.

Hermes Transportes Blindados

Java Developer

Lima, Peru

Jul 2013 – Feb 2014

- o Developed enterprise backend systems using Java, Spring Core, PL/SQL, MyBatis, Oracle Forms, and WebLogic.
- o Built SOAP integrations using JAX-WS for enterprise system communication.
- o Optimized Oracle database operations and designed technical documentation using UML methodologies.

CSTI Corp

Java Developer (Founding Engineer & Sales Contributor)

Guayaquil, Ecuador

Jul 2012 – Jun 2013

- o Contributed as a founding engineer supporting both technical delivery and client-facing solution design activities.
- o Designed electronic invoicing platforms using SOAP, XML, XAdES-BES, XPath, XSD, and XQuery for high-volume fiscal document processing.
- o Built SAP integrations using SAP JCo and RFC, enabling enterprise interoperability.
- o Developed Java desktop applications and operational reporting tools using Swing, JDBC, SQLite, iReport, and Apache POI.

GTE Perú

Java Junior Developer

Lima, Peru

Sep 2011 – May 2012

- o Developed telecommunications network management solutions integrating with DSLAM devices using TL-1 and CLI protocols.
- o Built backend and web applications using Java, Spring MVC, JSP, and Servlets.
- o Developed visualization interfaces and deployed applications on Apache Tomcat and Solaris environments.

Turismo Dias

Java Junior Developer

Trujillo, Peru

Sep 2011 – May 2012

- o Developed enterprise web applications using Java, JSP, Servlets, Struts, JPA, MySQL, and SQL Server.
- o Built backend services and optimized database access layers improving operational workflows and system maintainability.

Selected Achievements

- o Designed and maintained cloud-based electronic invoicing platforms processing thousands of fiscal documents daily with high availability and regulatory compliance.
- o Led backend modernization and distributed systems initiatives across retail, logistics, telecommunications, and payment processing domains.
- o Delivered CI/CD automation and infrastructure-as-code strategies that improved deployment reliability and reduced operational overhead.
- o Contributed to scalable payment and POS integrations supporting enterprise retail operations across 1,000+ stores.

Skills

Languages: Java, Kotlin, SQL, JavaScript **Backend & Architecture:** Spring Boot, Spring Framework, Microservices, Distributed Systems, Event-Driven Architecture, RESTful APIs, SOAP Services, JPA/Hibernate, Exposed **API Design:** OpenAPI Specification (OAS), Swagger, API documentation, contract-first design **Messaging & Integration:** Kafka, RabbitMQ, ActiveMQ, MQTT, SAP JCo/RFC, API Gateway, Electronic Invoicing Integrations **Cloud & DevOps:** AWS, Docker, Terraform, Ansible, Jenkins, GitLab CI/CD, Infrastructure as Code, CI/CD Automation **Databases:** PostgreSQL, MySQL, SQL Server, Oracle, SQLite, MongoDB, Redis **Frontend:** Angular, AngularJS, HTML, CSS, JavaScript, JQuery **Engineering Practices:** Technical Leadership, System Design, Code Reviews, Agile/Scrum, Automated Testing, Observability **Architecture Domains:** Solution Architecture, Software Architecture, Cloud Architecture, Integration Architecture, Event-Driven Systems, Platform Engineering, Enterprise Modernization

Certifications

AWS Certified Cloud Practitioner

Oracle Certified Professional, Java SE 6 Programmer (OCPJP 6)

Cisco Certified Network Associate (CCNA 4)

Languages

Spanish (Native)

English (Professional Working Proficiency)

Education

Master's Degree in Technology Management – University of Guanajuato

Bachelor's Degree in Computer Science – National University of Trujillo
